

Advantage^{NFP} Box Office Layout Screen

The starting point for the Box Office system is to design the layout plans – maybe only one, maybe many different possibilities for different venues. The Layout Designer allows you to add fixed structures such as stages, and to design row layouts, including seat sizes and spacing.

Once the layouts are designed, each one can be used to set up multiple events.

Advantage^{NFP} Box Office Seat Allocation

This is the main Event Detail screen, and includes the layout plan, now available for booking seats. Setting up the event includes identifying seat prices and other characteristics of individual seats or groups of seats, as well as discount schemes covering one or more events.

You can see at a glance which seats have been booked.

Tickets have already been issued for seats marked , while  indicates seats for which tickets have not been issued yet.

Seats can be selected for booking via this screen, but seats can also be booked and automatically assigned through a link to your own website.

Sales Value		
Qualifying Seat Price		20
Minimum Total Ticket Spend		0
Commitment Type	<None>	
Role	<None>	

Benefits

Free Seats: 0

Discount (%): 10

Amongst a number of optional features within Advantage Box Office is the ability to assign discounts on multiple seats across one or many events, based on a total value or a total number of tickets.

This is the screen for setting up a discount scheme. Once available, a discount scheme can be assigned to one or more events, and its rules are automatically applied to ticket bookings, whether direct or through the website link.
